

From sewing machine to healthcare supplier.

Dawn Distributors started when the founder noticed a lack of affordable and high-quality sheet supplies. Together with her passion for sewing, economical attributes, and care co-ordinator skillset, the founder saw herself doing just about everything for her clients. In the process, she ensured that households were run cost effectively and efficiently. In hindsight, this is what led Derks to start her own draw sheet supplier distribution company.

"Starting a business in this industry was not easy, but I was determined to make it work. I've always been passionate about healthcare, and I saw a shortage in the market for reusable waterproof draw sheets," says Derks, founder of Dawn D Distributors.

"Sewing has always been my hobby and an affordable solution to sustain myself as a single mother. When my kids were small I made their clothing because I was excellent in sewing and it seemed to have become the economical route for me. This has been a valuable skillset that has transferred to my role as a care co-ordinator to many international retirees looking to settle in South Africa. Many times I found my clients retired in South Africa without their families. As a result, I would oversee their households due to my long-standing expertise in the field. It's always given me the utmost pleasure knowing that my patients' families trust me to assist in this way. Whatever the patients' needs were, I would always be the one to take care of it," says Derks.

Derks continues: "Our goal at Dawn D Distributors is to be an affordable hospital draw sheet supplier while still offering quality products and assisting our customers to the best of our ability. We strive to be reliable and dependable in the medical supplies field."

We are committed to providing high-quality, affordable bed sheets to hospitals and healthcare centres across South Africa.
